

Lynx Fulfillment is an FDA Registered Warehouse

FDA registration expands scope of Lynx Fulfillment's operations.

Olean, N.Y., July 20, 2009 - Lynx Fulfillment, a fulfillment, warehousing and logistics service provider for e-commerce and retail businesses is now a Food and Drug Administration registered warehouse.

The registration will allow Lynx Fulfillment to expand its client reach to include the nutritional and dietary supplement industry.

“We are excited to expand our scope into the supplement industry. We have received many requests for this service. After investing heavily in technology, we are now able to provide greater efficiency, safety and security by providing real-time lot tracking. We wanted to ensure that the end user received the correct item every time. In the event that a product is recalled, our systems allow us to provide real time information such as who received that lot and on what day.”
